## Education

2016 - 2018

### SPM

Sekolah Menengah Teknik Alor  
Setar (ASTECH)

2019 - 2022

### Diploma In Computer Engineering

University Malaysia Perlis  
CGPA: 3.1

2022 - 2026

### Degree In Electronic Network Design

University Malaysia Perlis  
CGPA: 3.16

# Muhammad Hariz Fahmi Bin Mohamad Shahidi

SOFTWARE ENGINEER | DEVELOPER | AI &  
AUTOMATION / BACKEND DEVELOPER

Final-year Bachelor of Electronic Engineering Technology (Electronic Network Design) student with hands-on experience in web application development, database management, and workflow automation through industrial training at MIMOS Academy. Worked on the development of an internal CRM system and the official MIMOS Academy Portal using PHP, MySQL, HTML, CSS, and JavaScript. Experienced in building business systems, automating workflows, preparing technical documentation, and supporting training programmes. Interested in Software Engineering, Full-Stack Development, AI, and Cybersecurity.

## Experience

February 2026 – July 2026

### MIMOS Academy (SBU under MIMOS Services Sdn. Bhd.) Software & Business Systems Intern

Worked on web application development, business system automation, and daily operational support for MIMOS Academy.

- Developed and enhanced the MIMOS Customer Relationship Management (CRM) System and MIMOS Academy Portal.
- Built and improved CRM modules for customer management, sales tracking, quotations, and invoices.
- Developed an automated participant registration workflow using Google Forms, Google Apps Script, PHP, and MySQL.
- Assisted in implementing secure authentication features, including Google OAuth and password recovery.
- Prepared quotations, cost sheets, invoice requests, and technical documentation for training programmes.
- Supported programme coordination, customer communication, and training sessions as an assistant trainer.
- Assisted in developing the AI System Thinking: Practical Applications Using Generative AI training module.

January 2022 – April 2022

### MASDAR Technologies Multimedia & Technology Intern

Supported multimedia production, website development, and drone inspection activities.

- Assisted in website development using HTML and Java.
- Supported drone operations for telecommunication infrastructure inspections.
- Prepared reports and documentation for inspection activities.
- Assisted with multimedia editing and content preparation.

## Certifications

- CCNAv7: Introduction to Networks
- CCNAv7: Switching, Routing, and Wireless Essentials
- CCNA: Enterprise Networking, Security, and Automation
- Introduction to Cybersecurity
- Introduction to Modern AI
- Intel Altera FPGA AI Courses
- AI Integrated Circuit Design and Fabrication (Asia Pacific University)

## Selected Projects

- **MIMOS Academy Portal**
  - A web-based Customer Relationship Management (CRM) system that centralises customer information, sales activities, quotations, and invoices.
  - Enables users to manage customer records, monitor sales progress, and track business documents in a single platform.
  - Includes automated participant registration and business card data processing to reduce manual administrative work.
- **MIMOS Customer Relationship Management (CRM)**
  - An official training portal that provides information about MIMOS Academy, training programmes, facilities, and events.
  - Allows users to register for training programmes, manage accounts, and submit enquiries through a secure web platform.
  - Implements secure user authentication and website security features to protect user information.
- **Google Forms Automation System**
  - An automated registration system that transfers participant information from Google Forms directly into the CRM database.
  - Reduces manual data entry and improves the accuracy and efficiency of participant registration.
- **Smart Combat – Mental Health Monitoring System**
  - A system that monitors students' stress levels by analysing EEG brainwave signals during physical activities.
  - Helps provide insights into mental well-being through real-time data collection and analysis.
- **IoT Smart Water Meter Reader**
  - A smart water monitoring system that records water usage using sensors and provides real-time consumption data.
  - Designed to improve monitoring accuracy and reduce manual meter reading.
- **Hotel Booking Management System**
  - Developed a database-driven hotel booking and guest management system.
  - Managed reservations, check-in/check-out, and customer records in a structured database.
  - Improved data organisation and simplified booking operations.

## Technical Skills

- Full-Stack Web Development**
  - PHP (Laravel concepts), HTML5, CSS3, JavaScript & AJAX
  - Responsive web application development
  - REST API integration & CRUD application development
  - Website deployment using cPanel & WinSCP
- Development Tools**
  - Git & GitHub
  - Visual Studio Code
  - cPanel
  - WinSCP
  - XAMPP
  - Microsoft Office & Excel
  - Canva
- Backend Development & Automation**
  - PHP backend development
  - Google Apps Script automation
  - Google Forms & Google Sheets integration
  - Business workflow automation
  - OCR-based data processing
- Database Management**
  - MySQL database design and management
  - SQL query development
  - phpMyAdmin
  - Firebase (Basic)
- Cybersecurity & Authentication**
  - Secure login and user authentication
  - Google OAuth integration
  - BCrypt password hashing
  - CSRF protection & session management
  - Input validation and password reset workflows
- Networking**
  - Cisco Packet Tracer
  - Wireshark
  - PuTTY
  - TCP/IP fundamentals
  - Basic network troubleshooting
- AI & Productivity**
  - ChatGPT
  - Google Gemini
  - NotebookLM
  - Microsoft Copilot
  - AI-assisted research & documentation
  - Prompt engineering

## Additional Skills

PHP • MySQL • JavaScript • HTML5 • CSS3 • Google Apps Script • REST API • CRM Development • Workflow Automation • Database Design • Business Process Automation • Technical Documentation • Responsive Web Design • System Testing • Debugging • Google OAuth • Cloudflare Turnstile • Git • cPanel • WinSCP • Wireshark • Cisco Packet Tracer • Microsoft Office • AI Productivity Tools
